## WORK EXPERIENCE

**Software Developer (Internship), iNterra Networks Limited, Abuja**
January 2017 – June 2017
- Built custom web applications tailored to client requirements
- Maintenance of existing company products
- Built a Facebook AI bot to automate customer service
- Built an Android app called tree-planting to enable Government track and reward tree planters in the country.
- Built a mobile/web application for the Petroleum Equalization Fund (PEF) to track all gas stations in the country
- Built a web application called iNtrust for identity and trust management
- Worked with the Nigerian Communications Commission (NCC) to build the special numbering project for allocating virtual numbers to individuals and businesses

**Software Developer (Internship), Central Bank of Nigeria, Abuja**
May 2019 – November 2019
- Worked on the export trade portal to enable seamless and digital trade([TradeSystem](TradeSystem))
- Built/Consumed APIs to enable Integration with various external stakeholders like Nigeria Inter-Bank Settlement System (NIBBS), Corporate Affairs Commission (CAC), Federal Inland Revenue Service (FIRS), Nigerian Export Promotion Council (NEPC) and various other corporate and governmental bodies to the Trade System
- Performed and managed Load and stress testing on the Trade portal
- Worked on CCMS which is used by all banks across Nigeria for handling customer complaints
- Used docker to containerize the Trade Portal
- Handled deployment and scaling of the trade portal
- Maintained and added new features to the CBN T24 system

**Software Developer, Quomodo Systems, Abuja**
November 2019 – Present
- I worked on a web application called Proqura ([Proqura](Proqura)). It's a platform sold to Government and Companies that simplifies and organizes procurement management.
- Built a web/mobile application called IQCentral ([IQCENTRAL](IQCENTRAL)) It is an online learning management system, similar to Udemy and Pluralsight.
- Handled application deployment to Azure server
- I used vultr.com and setup a bare metal Linux server.
- Worked a project called Testmi which was used by NCDMB to host an exam that was taken by individuals all over the country
- Scaled up and handled DevOps for the Testmi project

**Software Developer (Remote/Contract), Thrive Moni (TMONI), Abuja**
**([https://thrivemoni.com/](https://thrivemoni.com/))**
May 2019 – Present
- Worked on the backend to implement new features
- Worked with AWS to help scale up the system

**Personal Project(s)**
- Built a job board called TechSpace that enables employers post jobs and candidates apply to jobs. (https://techspaceng.herokuapp.com/)
- Built a URL Shortening service ([KODR](KODR))
- Built a clone of the popular anonymous messaging service Sarahah ([ORAMAH](ORAMAH))

**Freelance Project(s)**
- Built an ecommerce web application called **BPRENTS** that enable users rent goods and services. ([BPRENTS](BPRENTS))
- Built a mobile app called **SKOOLEO** for a startup that enable parents pay school fees online. ([Skooleo](Skooleo))
